

The new Quality Health Network platform has many features that allow Users more flexibility and options in their usage of the system. However the refinement of the system to meet our Users work-flow needs is an ongoing process. This process requires the support of our Users to give us input, feedback and their valuable time to help us test and improve new functionality.

Below is a list of the 27 enhancements and upgrades that are currently in the work queue. This list is dynamic with new enhancement requests continually being evaluated.

We are currently on release 2.4.14.1

Item	Description	Targeted Release and/or Tentative Release Date
Organizational Results	Add the ability for an organization to view all their results	Completed
Create a way to share documents to another clinician via a secured methodology	Added the Share button when displaying an encounter or result. Uses QHN Direct mail to send securely.	Completed
Allow users to upload documents	Created the Patient Document tab	Completed
Provide role based access to payors	Payor Portal implemented	Completed
Allow for delivery process to be built locally	QHN has access to build and maintain the processes needed to deliver to disparate EHRs	Completed
Display Lab Director information on results	Need to be able to identify the lab and the lab director	Completed
Allow for users to reset their own password	Users can reset their password through email	Completed
Allow for the secure transfer of results to those practices without an EHR	Created process to Secure File Transfer (SFTP) to those practices	Completed
Receive CCD from a Hospital system and deliver it	For those hospital system that can send a CCD to QHN it can then be delivered securely via email to recipients	Completed
Single Sign On	For those customers that have the ability to provide for a secure call to QHN from within their EHR or hospital system, allow for single sign on	Completed St. Mary's RMC and one additional customer
