

Improving care through shared technology

**QualityHealthNetwork.org**

Quality Health Network (QHN), one of the leading Health Information Exchanges (HIE) in the United States is seeking a programmer analyst.

**Programmer Analyst:**

The successful candidate will provide support to a wide variety of critical software applications. The Programmer Analyst will work independently and with other Programmers to develop custom scripts and applications based on our project priority list, test applications regularly, and support our external business development staff requests by scoping and implementing new solutions to customer requests.

**Responsibilities:**

- Design, Develop, Test and Implement solutions to problems and requests
- Manage assigned projects
- Develop and distribute support documentation for applications and software
- Prioritize and respond to support ticket requests

**Qualifications and skills:**

- Bachelor's Degree in Computer Science, related field or equivalent experience
- Health Care experience a plus but not required
- Experience with object-oriented programming languages, web services, and API development
- Ability to analyze systems and logic flow and determine flaws and weaknesses that need to be addressed
- Ability to apply critical thinking skills to assigned tasks
- Ability to work in highly dynamic fast paced team work environment
- Effective oral and written communication skills

This is an on-site position located in Grand Junction, CO, where you will find big-city opportunities with small-town character and incomparable access to the great outdoors.

QHN offers an exceptional benefit package to its employees. We welcome the opportunity to visit with you about your qualifications and past experience as well as what QHN can offer you!
