The **Lab Charts** (graph) function in the QHN system provides an accurate display of laboratory testing overtime from disparate sources to assist in patient diagnosis and treatment. This feature allows you to chart results, from a selected date range, with a few quick clicks from the **Patient Summary**.

**Access to Lab Charts:**
1. Navigate to the **Patient Summary** section for the patient of interest.
2. In order to chart labs all patient data must display. A blue bar **MAY** appear indicating there is more data to display, click on **Show All Data** in the **Patient Actions** section.
3. Once data has loaded click on **Lab Charts**.
4. The **Lab Chart** view will open. Click on the down arrow in the **Test Name** box.
5. You may either scroll through the tests listed or begin typing in the search box.

**QHN Tip Sheet #12**

**Updated: May, 2016**
Access to Lab Charts, cont.:

6. Once you have selected the test you wish to graph the date range will default to All. If you wish you may select a date range, using the Time Range drop-down, once selected, click Apply.

7. You may select to display the results in a Horizontal or Vertical Time Axis.

8. Click on the graph icon next to the Element you wish to graph. Graph will appear.

Please note: if no graph icon appears next to Element graph option is not available, as a non-numeric data element occurs in one or more result.

9. If you hover your mouse over a data point the detail will appear.

10. To print, right click on the graph.
