

Save time by selecting multiple reports/results in the Patient Summary to either “Share” through an interface to your EHR, send via Direct to another provider, or download as a PDF document.

- Click selection checkboxes next to reports/results
- You may elect to **Share** or **Download** items as PDF.

Selection check boxes display next to each report/result in the Patient Summary.

Caution! Make your selection carefully. If the option - **Send Summary to Me** is selected you may inadvertently send volumes of unwanted information (the entire summaries, not just reports selected) to your EHR.

Download Selected Items as PDF
