

This platform functionality allows you to use an asterisk (*) within a search as a placeholder character that represents one or more other characters when searching a patient name in the Patient Summary. For example, when searching for a patient who's last name is Home, if you are unsure of the correct spelling you may enter H*, Ho*, or as many characters in the last name as you know followed by an asterisk, plus the patient's birthdate. The sample search below was done by typing in Ho* and the birthdate.
