

Please note that VA and DoD data may be returned commingled.

For the query to be efficient you must **specify Service Start and/or End Dates**:

You can use any combination of the “Service Date” fields to narrow you’re search down.

For example: Enter either the beginning date of the range you want to query for in the “Service Date Start Between” field and the end date of the range you’re querying for in the “Service Date End Between” field.

Service Date Start Between  And 

Service Date End Between  And 

If you’re not certain when the service started or ended you can enter dates in both of the “Service Start /End Date Between” fields.

Service Date Start Between  And 

Service Date End Between  And 

If you’re not certain about when service started but know when it ended you would enter something like this:

Service Date Start Between  And 

Service Date End Between  And 

VA External Document Search: Querying the VA through QHN Results

Submit External Document Search

Select Endpoints: Arizona Health-e Connection, CORHIO, Utah Health Information Network, **VA and DoD JointHIE**

Format Type: CDA, CCDA, Unspecified

Document Type: Admission History and Physical Note, Discharge Summarization Note, Laboratory Studies, Obstetrical Studies, Laboratory Report, Pathology Study Reports, Summarization of Episode Note

Entry Type: Stable, On-Demand, Stable and On-Demand, Unspecified

Creation Date Between: [] And []

Service Date Start Between: [] And []

Service Date End Between: [] And []

Role*: Provider/Care Team Membe

Reason*: Treatment

Authorizing Provider: []

Submit **Cancel**

Select the "VA and DoD JointHIE" endpoint. Leave all other options with their default values except for the "Reason" field. That field should be set to "Treatment" for the VA to return anything.

When the query executes successfully **data will be returned in the "Retrieved Documents" section of the "External Document Search" tab** in QHN Results.

- Please note: QHN does not control what data the VA sends back.
- You will possibly see a mixture of documents that are human readable (indicated by the "PDF" and "HTML" in the "Download" area below) and those that aren't.
- The VA and DoD may return documents that are meant to be consumed by an Electronic Health Record only and are not for reading (indicated by "Document" and "Attachment" in the "Download" area below).
