As of January 2022, QHN users with access to the Prescription Drug Monitoring Program (PDMP) documents can also find the info via OpiSafe.

If you are using OpiSafe for the first time, you will need to set up your access. A new window will open. Select your State and click Continue.

Next, enter your PDMP Account Username, PDMP Password and confirm. Check the box to grant agent authorization. Select Connect PDMP/PMP Account.
Once access is validated, you will see this screen. The first icon is PDMP:

If you select an icon that is not available, you will see these:

**Toxicology** ↓

Unfractionated ionized calcium can be displayed alongside the PDMP fill history to make it easy to view any inconsistencies that affect the risk of misuse or overdose of opioids for a patient. Currently, this functionality is not available for your organization.

If you would find this capability useful, respond yes below and we will work with your organization to enable this functionality.

- [ ] No
- [x] Yes

**Assessments** ↓

Patient reported assessment data can be displayed alongside the PDMP fill history to make it easy to monitor patient self-reported values and historical trends that affect the risk of misuse or overdose of opioids for a patient. Currently, this functionality is not available for your organization.

If you would find this capability useful, respond yes below and we will work with your organization to enable this functionality.

- [ ] No
- [x] Yes
Available options: **Guidelines**

This section displays guideline content and monitors CDC guideline adherence. It will automatically mark off activities as they are executed within the OpiSafe platform. No user intervention is required.

---

Available options: **Refer to Treatment - MAT Options**

When you click on the treatment locator icon, the system will search multiple sources and return a list of medication assisted providers by location, insurance coverage, and type of services.

The providers can be viewed in a list view or map view.

If a patient is a member of Health First Colorado insurance, results will be prioritized by Health First Colorado designated Centers of Excellence as well as In-Network providers.

**List View:**

**Map View:**

To start a new search, close your OpiSafe window. This returns you to QHN.
