

PDMP via OPIsafe

Updated January 2022

As of January 2022, QHN users with access to the Prescription Drug Monitoring Program (PDMP) documents can also find the info via OpiSafe.

If you are using OpiSafe for the first time, you will need to set up your access. A new window will open. Select your State and click Continue.

Next, enter your PDMP Account Username, PDMP Password and confirm. Check the box to grant agent authorization. Select Connect PDMP/PMP Account.

| Patlent, Qhn (DOB: 01/01/2000) | | | Patient, Qhn (DO8: 01/01/2000) | |

This section displays guideline content and monitors CDC guideline adherence.

It will automatically mark off activities as they are executed within the OpiSafe platform.

No user intervention is required.

Available options: Refer to Treatment- MAT Options

When you click on the treatment locator icon, the system will search multiple sources and return a list of medication assisted providers by location, insurance coverage, and type of services.

The providers can be viewed in a list view or map view.

If a patient is a member of Health First Colorado insurance, results will be prioritized by Health First Colorado designated Centers of Excellence as well as In-Network providers.
