

# REPORTING & ANALYTICS SERVICES

Quality Health Network (QHN) is an award-winning, Whole Health Information Exchange (WHIE) organization helping medical, behavioral, and social health providers in western Colorado securely share patient and client data to enhance care coordination, reduce duplication of services, and identify individuals at risk so efforts can be focused where they are needed most.

**Connecting People** *for better health*

We make the most of the data we collect, store, and securely share for you. Knowing that the health, social, and behavioral data we collect and aggregate can improve the quality and efficiency of care, we also want to help you identify areas for improvement and possible gaps in care. Identifying patterns and trends can make each of your patients healthier while contributing to the overall population health of our community.
